PROFESSIONAL SUMMARY

Results-driven Full-Stack & Mobile Developer with 3+ years of experience building secure, scalable web and mobile applications using React.js, Next.js, Node.js, TypeScript, and React Native. Specialises in end-to-end feature delivery — from pixel-perfect, responsive frontends to hardened RESTful APIs, dual-gateway payment integrations (Paystack & Stripe), and real-time mobile experiences. Applies security best practices (JWT, HTTP-only cookies, RBAC, input validation) as standard. Proven collaborator in remote, cross-functional teams with a track record of shipping production-ready products on schedule.

TECHNICAL SKILLS

Frontend	React.js · Next.js · TypeScript · JavaScript (ES6+) · HTML5 · CSS3 · Tailwind CSS · CSS Grid · Flexbox · Framer Motion
Backend	Node.js · Express.js · REST APIs · JWT Authentication · HTTP-only Cookies · RBAC · API Security · Input Validation
Mobile	React Native (Expo) · Firebase Push Notifications
Database	MongoDB · PostgreSQL
Payments	Paystack · Stripe (webhook verification, idempotent transactions)
Tools	Git · GitHub · Postman · Vercel · Firebase · CI/CD

PROFESSIONAL EXPERIENCE

Frontend Developer (Remote) · **Silicon Delta Innovation Hub**

2023 – Present · Remote

- Engineered responsive, accessible UIs with React.js, Next.js, TypeScript, and Tailwind CSS, cutting page load time by ~30% via code-splitting and lazy loading.
- Built a reusable component library adopted across 3+ internal projects, reducing frontend development time by an estimated 25% per sprint.
- Integrated third-party APIs and managed application state across complex, multi-step user flows, eliminating data-consistency bugs reported in QA.
- Delivered Framer Motion animations and micro-interactions that improved measurable user engagement and session duration.
- Collaborated asynchronously with designers and backend engineers across time zones, consistently meeting or beating sprint deadlines.

Backend Developer · **Solnx**

2022 – 2023 · On-site / Hybrid

- Designed and shipped secure RESTful APIs with Node.js and Express.js, maintaining sub-200ms average response times under production load.
- Implemented JWT authentication with HTTP-only cookie storage, refresh token rotation, and CSRF protection — hardening endpoints against XSS and session-hijacking attacks.
- Integrated Paystack and Stripe payment gateways end-to-end, including webhook signature verification, idempotent transaction records, and automated reconciliation logic.
- Optimised MongoDB and PostgreSQL schemas with strategic indexing, improving critical query performance by up to 40%.
- Authored Postman API documentation and collection suites, cutting new-developer onboarding time significantly.

Mobile App Developer · **Freelance / Contract** 2022 – Present · Remote

- Developed cross-platform mobile apps with React Native (Expo) targeting iOS and Android from a single codebase, reducing release overhead.
- Integrated Firebase for real-time data sync, cloud authentication, and push notifications, enabling live in-app updates without user-initiated refresh.
- Improved app startup time and scroll performance using FlatList virtualisation, memoisation, and Hermes engine configuration.

PROJECTS

Full-Stack E-Commerce Platform — Next.js · TypeScript · Node.js · Express.js · MongoDB · Tailwind CSS · Paystack · Stripe

- Built a production-ready store with product catalog, dynamic cart, order management, and real-time inventory tracking.
- Secured authentication with JWT + HTTP-only cookies, refresh token rotation, and role-based access control (RBAC) for admin vs. customer roles.
- Integrated both Paystack and Stripe payment gateways with webhook signature verification and idempotent transaction logging — handling edge cases like duplicate events and failed retries.
- Delivered a full admin dashboard for product CRUD, order status updates, and sales analytics.
- Achieved fully responsive layouts across mobile, tablet, and desktop with Tailwind CSS and CSS Grid.

Personal Developer Portfolio — Next.js · TypeScript · Framer Motion · Tailwind CSS · Vercel

- Designed and shipped a modern animated portfolio with SSR, achieving a Lighthouse performance score of 95+.
- Implemented scroll-triggered and page-transition animations with Framer Motion at consistent 60fps.

EDUCATION

B.Sc. Computer Science · University of Port Harcourt · Rivers State, Nigeria

Department of Computer Science

ADDITIONAL INFORMATION

Availability: Open to full-time, contract, and remote-first international roles. Comfortable with async collaboration across multiple time zones.

Languages: English — Professional working proficiency

Interests: Open-source contribution · API design patterns · Developer tooling · UI/UX engineering · Payment systems
